

TCP sockets

client

int socket()

int connect()

Server

int socket()

int bind()

int listen()

int accept()

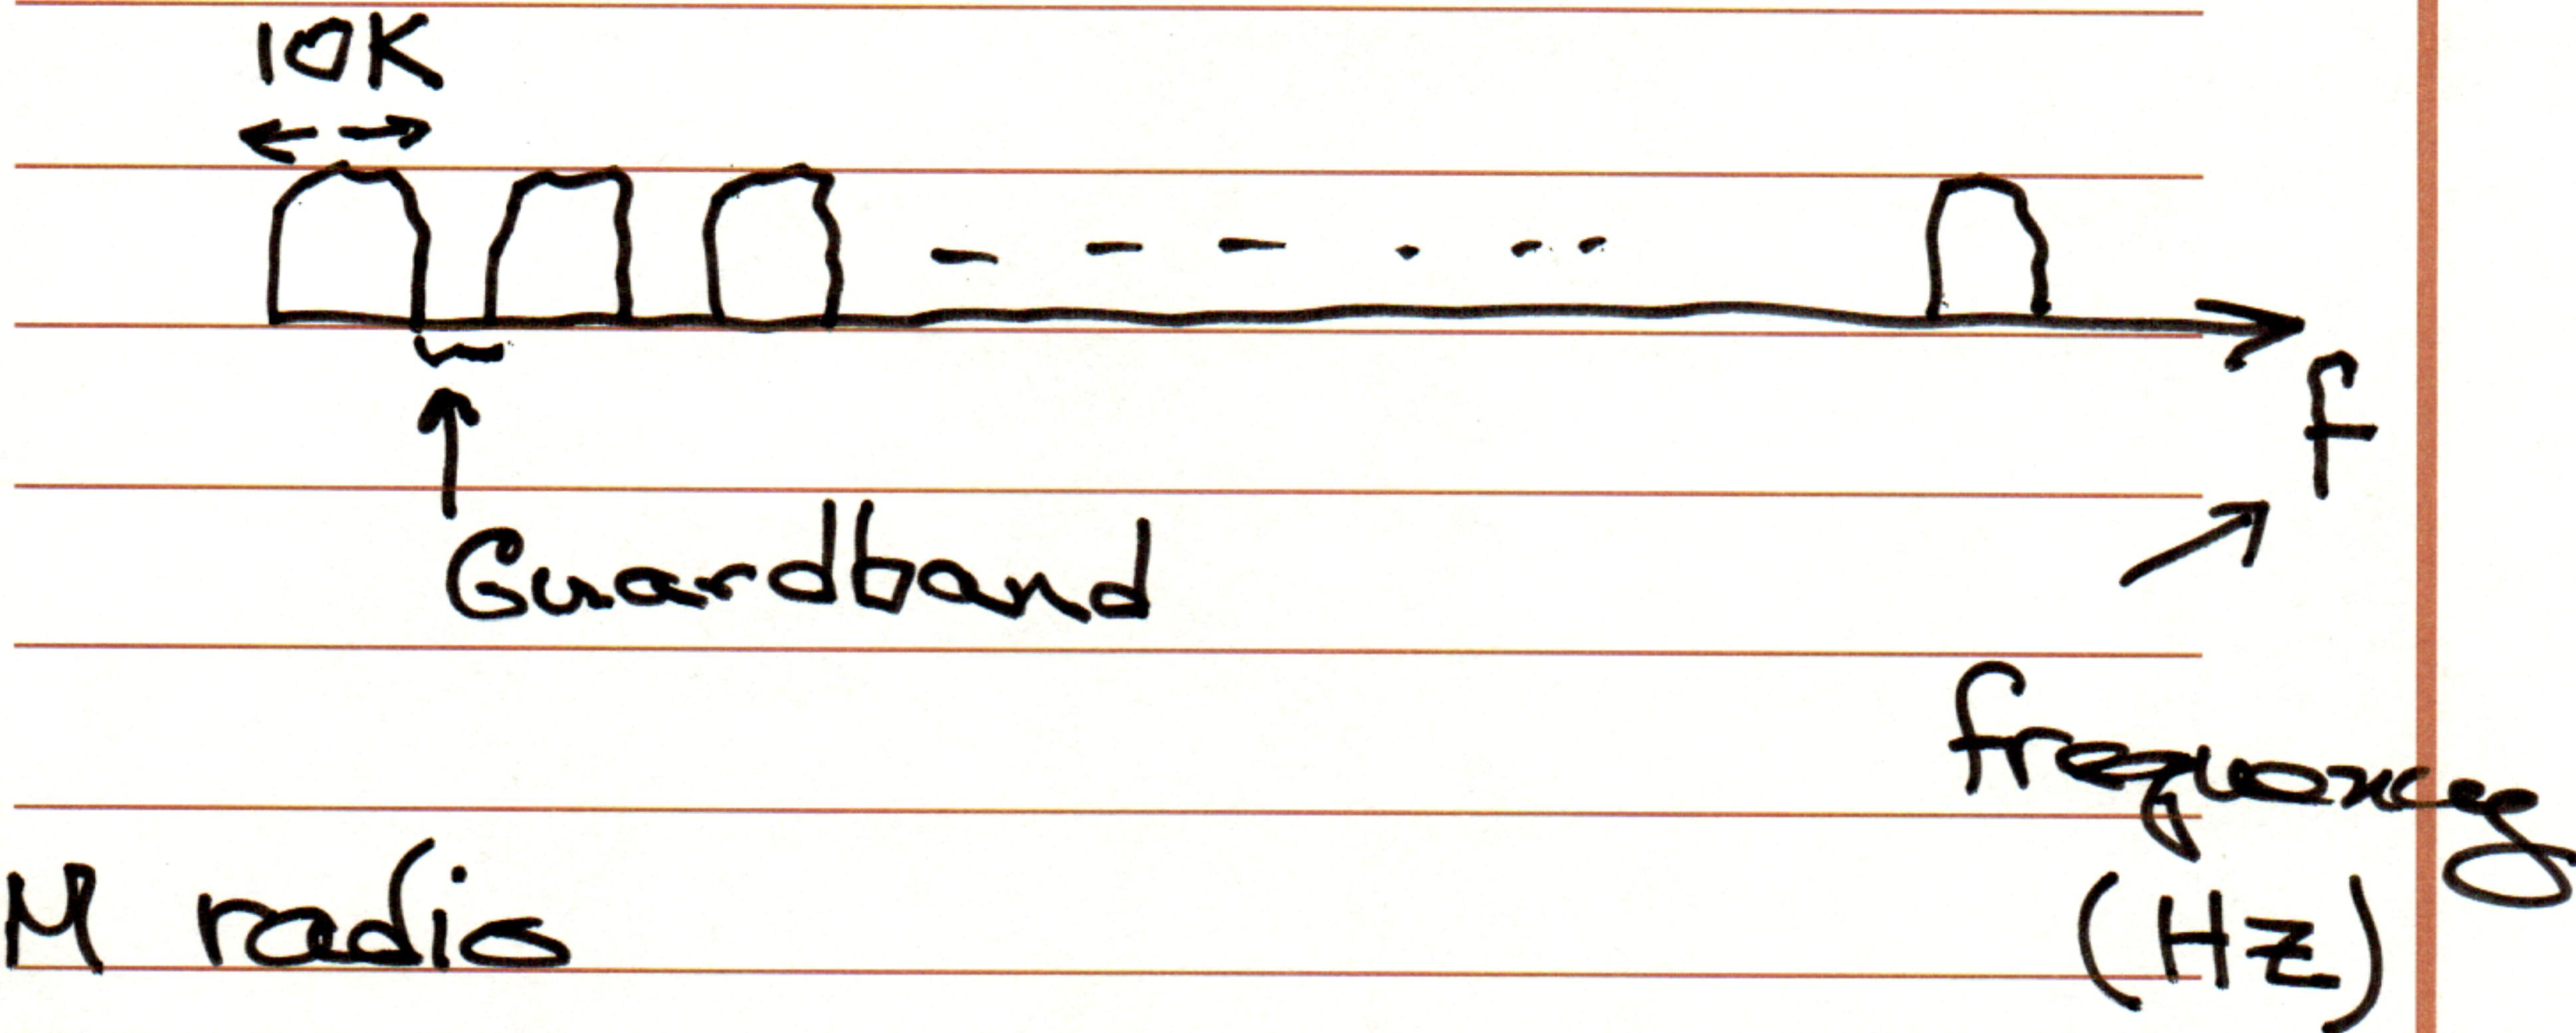

in UDP, the send command
is

int sendto(socket, message,
message length,
remote address)

int recvfrom(socket, receiver buffer,
buffer length, source)

"Beej's Tutorial"

FDM

AM radio

frequency
(Hz)

FCC : Federal Communication Commission

600kHz ~ 1600kHz

is allocated to AM radio.

$$1600\text{K} - 600\text{K} = 1000\text{K}$$

$$= \cancel{1000\text{K}}$$

$$= 1\text{MHz}.$$

FM 88.1 ~ 108.1 MHz

20MHz total

each ch 200kHz

100 channels.
